

**Leaders in
surface preparation**

SPECIALIST SURFACE PREPARATION LTD

Where we work

Bridges

We work across the UK as a specialist contractor on bridges. We have the equipment to remove any materials from bridges, from spray-applied membranes to traditional bitumen

Industrial Flooring

As well as shotblasting and grinding, our ride on and pedestrian scabbling machines can remove any surface layer on industrial floors – surfaces like latex, paint or glue are no match for us!

Whether you are resurfacing a 200m² unit or a 20,000m² industrial plant, we have the men and the machinery to deliver

Multistorey car parks

We are specialists in removing the waterproof membranes on top decks, as well as blasting and diamond grinding all lower levels. We have the full range of equipment to enable us to provide the perfect surface for your coatings

Other industries

If you are involved with any of the following, then you should be talking to SSP

- ◆ road texturing
- ◆ railway platforms
- ◆ anti-slip areas
- ◆ runways

Specialist Surface Preparation

SSP are leaders in surface preparation using a comprehensive range of specialist equipment.

We are one of the largest independently owned surface preparation companies in the UK and have over 30 years combined experience and the latest equipment with which to tackle any surface including glue and latex, screed, bitumen, and spray applied waterproof membranes

Our expertise spans three decades and we have experience in all aspects of surface preparation. We constantly upgrade and improve our systems to be in the forefront of this field.

Preparation is the most important aspect of any flooring project and we provide dust free captive shot blasting, diamond grinding, concrete reduction and planing, and re-texturing.

We have built up a large customer base gained through our excellent reputation for high quality workmanship and our ability to deliver a first class service.

Our Services

- ◆ Laitence removal on new concrete
- ◆ Provide SA2 5 on steel surfaces
- ◆ Removal of old paints and coatings
- ◆ Removal of vinyls and carpets
- ◆ Exposing aggregates for profiles to accept screeds
- ◆ Texture or removal of old concrete
- ◆ Refurbishment of old concrete
- ◆ Dust free systems utilised
- ◆ Provide non-slip surfaces
- ◆ Car park and bridge deck refurbishment
